

SOLUTIONS

Needs Analysis

With over 200 years of combined **Asset Management** experience PALNET USA has the industry knowledge and expertise to develop a cost effective **Asset Management** program. Prior to implementation our experts will work with your staff to analyze your supply chain and develop a comprehensive solution to maximize your operational efficiency. Our Needs Analyses program includes:

- Detailed Supply Chain Analysis
- Solution Development Plan
- Rollout Timetable (Gantt Chart)

Total Asset Management

Every organization has unique **Asset Management** requirements. As North America's leading **Asset Management** company PALNET USA, has the infrastructure and industry experience to put your mind at ease. Allowing you to reassign your staff and concentrate on your core business. Our experts will set up a comprehensive "Total **Asset Management**" program tailored to your unique operational requirements. There are several ways the PALNET USA's Total **Asset Management** program can benefit your company:

- Pallet Supply
- Pallet Retrieval Services
- On-Site Pallet Sortation and Repair
- Pallet Banking
- Pallet Removal
- Study of Current Volumes and Sizes
- Pallet Design Specifications (PDS)
- Online Tracking and reporting of Transactions
- Third party pallet return

Itemized monthly e-reports will make your financial accounting simple and pain free. Each bill includes: pallet balance, total pallets received, total pallets shipped for repair and regular prices and accurate cost per unit.

SOLUTIONS

Dock Sweep

PALNET USA's Dock Sweep program is designed to remove your staff from the **Asset Management** process. With a fleet of over 1,800 trailers PALNET USA has the capacity to meet your Dock Sweeping needs. PALNET USA will drop a trailer at your facility for convenient and continuous loading of unwanted or excess Assets. Trailers will be replaced on a pre determined schedule or an on-call basis. All Assets are moved to a PALNET USA facility for sorting and disposition. Inventory information and reports will be available online.

- A PALNET supplied truck removes all excess or unusable Assets on a previously agreed upon schedule
- Returnable Assets are loaded on the appropriate equipment
- Facility management is free to staff based on operational needs
- Online information and reporting of all transactions

On-Site Sortation

PALNET USA's On-Site **Asset Management** program is designed to help you maximize the efficiency of your facility. This removes your staff from the business of sorting pallets and other Assets. We will manage all on-site personnel, product removal and Asset transfer to our processing facility. We will also manage all customer relation issues.

- An SOP is developed with uniform pallet condition standards and minimum inventory levels
- PALNET personnel will perform all **Asset Management** functions within the facility, including pallet sorting, restacking, outbound loading and accounting
- A PALNET supplied truck removes all damaged or overstock Assets on a previously agreed upon schedule
- Returnable Assets are loaded on appropriate equipment
- All **Asset Management** related waste can be removed for environmentally friendly disposal
- Facility management is free to staff based on operational needs
- Online information and reporting of all transactions

SOLUTIONS

On-Site Repair

If you have a closed loop system or would just like to retain control of your **Asset Management** program PALNET USA has the resources and expertise to efficiently manage your **Asset Management** program. We will sort your Assets, according to your standards, for return to inventory, repair or removal from your facility.

- An SOP is developed with uniform pallet standards and minimum inventory levels
- PALNET personnel will control all **Asset Management** needs within the facility
- Usable Assets are immediately returned to inventory
- Repairable Assets are repaired according to the SOP and returned to inventory
- Unrepairable and unusable Assets are loaded on a PALNET USA truck
- Returnable Assets are loaded on appropriate equipment
- All transportation related cardboard, plastic or other materials are removed for environmentally friendly disposal.
- Facility management is free to staff based on operational needs
- Online information and reporting of all transactions

Store Pick-up

When your stores produce significant excess Assets PALNET USA can work with you to develop a comprehensive program that will simplify and improve your supply chain. With PALNET USA's Store Pick-up program we can remove the all Asset from your stores using our fleet. All Assets are returned to a designated facility for sorting and processing. A detailed inventory of all Assets is provided for your records.

- A PALNET supplied truck removes all excess or unusable Assets on a previously agreed upon schedule
- Management is free to reallocate resources to other key areas
- Online information and reporting of all transactions
